

Committee on Mathematical Biology

We are disturbed by the drastic reductions that have been imposed on the Committee on Mathematical Biology, headed by N. Rashevsky at the University of Chicago. We wish to point out that the work of this department, the only one of its kind in the world, is of great interest and importance in our diverse fields of research, that is, in biology, clinical medicine, mathematics, psychology, philosophy, and sociology. We feel that it would be a loss if that work were seriously reduced.

*Research Laboratory of Electronics,
Massachusetts Institute of
Technology, Cambridge*

*Department of Philosophy, University
of Chicago, Chicago, Illinois*

*Department of Psychology,
University of California, Berkeley*

*Department of Neurophysiology,
Washington University Medical
School, St. Louis, Missouri*

*Department of Surgery,
University of Iowa, Iowa City*

*Department of Anatomy, University of
Illinois College of Medicine, Chicago*

*Department of Mathematics, Illinois
Institute of Technology, Chicago*

*Institute for Music Research,
Marine Biological Laboratory,
Woods Hole, Massachusetts*
